

Adrian Mendez

Full Stack Developer

Houston, TX | (832) 941 - 9128 | adrian@adrianmendez.me | adrianmendez.me | github.com/adrianmendez03

SUMMARY

Full Stack Developer with over a decade of craftsmanship experience. I bring a hands-on approach to building useful and intuitive products to the digital space. My work using various front and back end technologies enables me to write clean, precise code, and design efficient systems.

SKILLS

Front End: HTML5, CSS, SASS, Bootstrap, JavaScript, jQuery, React, PHP

Back End: Node.JS, Express.JS, Sequelize, Ruby, Rails, Python, APIs

Database: MongoDB, Postgresql, MySQL, SQLite3, SQL

Soft: Troubleshooting, Communication, Writing, Project Management, Collaborative

PROJECTS

Text.io [[demo](#) | [github](#)]

Full Stack Developer

- Developed custom API to handle CRUD transactions using Express, Sequelize, and MySQL.
- Achieved real time texting application by using socket.io - enabling event based communication between a server and multiple browsers at once.

PC - Builder [[demo](#) | [Front-End: github](#) | [Back-End: github](#)]

Full Stack Developer

- Responsible for designing an API and developing RESTful web services for a MERN application.
- Worked alongside another developer to design system architecture which enabled the team to work more efficiently, resulting in project completion ahead of deadline.
- Operated in an agile team - helped prioritize and scope features to ensure the most costly features were developed first.

News Application [[demo](#) | [github](#)]

Front-End Developer

- Planned the system architecture and design of a News Application - from components used, probable state and api calls, and responsiveness on all screen sizes.
- Conducted systems integration testing with modules and external API.

EXPERIENCE

Full-Stack Developer Fellow, General Assembly

Dec 2020 - March 2021

- Completed 480 hours of curriculum covering HTML, CSS, jQuery, React, Ruby, and Rails.

Front-End Developer, The Peter Project

Jan 2021

- Built non-profit's dynamic and browser friendly website using HTML, CSS, and jQuery.

EDUCATION

General Assembly

Software Engineering, Certificate of Completion

University of Houston

Coursework: Programming fundamentals, Data Structures, Algorithms, Bug Fixing, Design Patterns
